

Low-cost Broadcasting Solutions, Consultancy, Training

Low cost radio broadcasting for all

Website: www.inaboxinnovations.com.au

ANNOUNCING THE LAUNCH OF KLEIO THE TABLE TOP LOW COST RADIO STATION

The KLEIO radio Station comprises of an elegant table top rack with CD/MP3 player, limiter/ compressor, speaker fader/switch, telephone hybrid and other optional equipment; an 8 channel mixer (larger mixers are options) which is connected to the equipment rack by a pre-installed cable loom, PC or notebook (for editing and play out), monitor speakers, microphones, microphone stands, FM stereo transmitter (power options are 30W, 100W, 300W or 1KW), antenna and antenna cable.

This composition makes a complete radio station which can be set up for broadcast within a day. A customised patch panel at the back of the rack provides access to all the inputs and outputs of the unit, a convenient way to connect

microphones, line inputs, auxiliary in and outs, speakers and the main output to the transmitter.

A telephone hybrid is provided to facilitate listener participation and live discussions with listeners. These discussions are broadcast live.

Programmes recorded on location using a digital audio recorder will be downloaded to the PC/note book for editing and subsequent play back for broadcast. A portable digital audio recorder is supplied.

Background

Rukmin Wijemanne* was the designer of the Radio-in-a-Box for UNESCO, which was marketed by the Asia-Pacific Broadcasting Union. UNESCO requested Rukmin Wijemanne to design a low-cost portable radio station for the use of community broadcasters and to

establish first level communications to disaster affected populations. This designer now offers many other options and improved versions.

Training and Consultancy

In a Box Innovations also offers training in various aspects of broadcasting as well as the setup and operation of its products and consultancy.
